Part 1 — WELDING JOURNAL
SUBJECT INDEX

A Most Challenging Project: Repair of the Sophia D — U. W. Aschemeier and K. S. Peters, (May) 38
A Summary of Revisions in the New D1.1: 2010, *Structural Welding Code — Steel* — J. L. Gayler and D. D. Rager, (July) 47
Accidents, Oxyfuel Equipment Advances Help Prevent — B. Boyer, (Nov) 42
Adaptive Control Techniques Advance Automatic Welding — P. Sagues, (Aug) 26
Air vs. Water Cooled: Which GMAW Gun Type Is Right for Your Application? — A. Monk, (Jan) 91
Alloy Steels, Selecting SAW Consumables for Low- — K. Packard, (Aug) 24
An Alternative Solution for Sputtering Targets for High-Volume Thin-Film Deposition — J. Villafuerte and D. Wright, (Sept) 28
Argon/Oxygen Shielding Gases Improve Carbon Steel GMAW — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
Artists 'Think' in Metal — K. Campbell, M. R. Johnsen, and H. Woodward, (July) 28
ASME Section IX?, What's New in — W. J. Sperko, (Aug) 44
Assurance in Field Heat Treatment, Quality — G. Lewis, (June) 46
Automatic Welding, Adaptive Control Techniques Advance — P. Sagues, (Aug) 26
Automating Field Welding for New Nuclear Construction — G. R. Cannell, E. Arms, and N. Chaubey, (May) 59
Automation, Maximizing Your Investment in Welding — R. Ryan and T. Jaeger, (Mar) 44
Automation: Opportunities for Increased Efficiency and Savings — D. Steadman, (Aug) 34
AWS Show, Special Report on the 2009 — K. Campbell, A. Cullison, C. Guzman, and M. R. Johnsen, (Feb) 37
Best Practices of GTAW 4130 Chrome-Moly Tubing — T. Bevis and A. Weyenberg, (April) 42
BP Modernizes U.S. Refinery — S. Disbrow and C. Kramer, (Feb) 32
Brazing Filler Metals — Good or Bad?, Liquidation of — D. Kay, (Sept) 36
Brazing Metal to Ceramic in an Oxygen-Containing Atmosphere — M. S. Reichle, T. Koppitz, and U. Reisgen, (Mar) 57
Brazing of Sapphire to Niobium, Direct — C. A. Walker, F. R. Trowbridge, and A. R. Wagner, (Mar) 50
Brazing Temperature, Calculating Joint Clearance at — D. G. Stroppa, T. Hermenegildo, J. Unfried S., N. Oliveira, and A. J. Ramirez, (Sept) 32
Calculating Joint Clearance at Brazing Temperature — D. G. Stroppa, T. Hermenegildo, J. Unfried S., N. Oliveira, and A. J. Ramirez, (Sept) 32
Carbon Steel GMAW, Argon/Oxygen Shielding Gases Improve — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
Career Ladder in Welding, Using Competency Models to Build a — D. W. Dickinson, (April) 53
Ceramic in an Oxygen-Containing Atmosphere, Brazing Metal to — M. S. Reichle, T. Koppitz, and U. Reisgen, (Mar) 57
Choosing a Shielding Gas for FCAW — T. Myers, (Mar) 30
Chrome-Moly Tubing, Best Practices of GTAW 4130 — T. Bevis and A. Weyenberg, (April) 42
Code Requirements for Calculating Heat Input, New — T. Melfi, (June) 1
Code — Steel, A Summary of Revisions in the New D1.1: 2010, *Structural Welding* — J. L. Gayler and D. D. Rager, (July) 47
Competency Models to Build a Career Ladder in Welding, Using — D. W. Dickinson, (April) 53
Competition Is a Family Affair — M. R. Johnsen, (June) 116
Complying with OSHA's Cr(VI) Regulations — S. Smith, (Nov) 28
Computational Weld Mechanics Help Industry?, How Can — S. S. Babu, G. Sonnenberg, C. Schwenk, J. Goldak, H. Porzner, S. P. Khurana, W. Zhang, and J. L. Gayler, (Jan) 40
Consumables for Low-Alloy Steels, Selecting SAW — K. Packard, (Aug) 24
Control Costs by Avoiding Overwelding — (Dec) 32
Control Techniques Advance Automatic Welding, Adaptive — P. Sagues, (Aug) 26
Copper Contamination Cracking in Austenitic Stainless Steel Welds — S. Rao and A. Y. Al-Kawaie, (Feb) 46
Correcting Thin-Plate Distortion in Shipbuilding — N. A. McPherson, (Jan) 30
Corrosion in a Refinery's Sour Water Unit?, What Caused — J. J. Perdomo, (Feb) 54
Costs by Avoiding Overwelding, Control — (Dec) 32
Cracking in Austenitic Stainless Steel Welds, Copper Contamination — S. Rao and A. Y. Al-Kawaie, (Feb) 46
Cranes, Weld Integrity Critical to Tower — G. Trommer, (April) 50
Creatures Decorate Canadian Water Park, Welded — S. Y. Tremblay, (June) 113
Direct Brazing of Sapphire to Niobium — C. A. Walker, F. R. Trowbridge, and A. R. Wagner, (Mar) 50
Distortion in Shipbuilding, Correcting Thin-Plate — N. A. McPherson, (Jan) 30
Driven Welding Machine, Selecting an Engine — E. Snyder, (April) 38
Efficiency and Savings, Automation: Opportunities for Increased — D. Steadman, (Aug) 34
Energy in Deep-Water Environment, Floating Turbine Captures Wind — V. I. Moe, (May) 54
Engine-Driven Welding Machine, Selecting an — E. Snyder, (April) 38
Establishing a Gas Safety Program — D. J. Marquard, (Nov) 40
Exothermic Cutting Equipment, Getting the Most Out of Your — C. Wilsoncroft, (Jan) 94
Fabricating Railcars with Resistance Welding — W. Jaxa-Rozen, (Dec) 26
FABTECH, (Oct) 44
Family Affair, Competition Is a — M. R. Johnsen, (June) 116
FCAW, Choosing a Shielding Gas for — T. Myers, (Mar) 30
Field Welding for New Nuclear Construction, Automating — G. R. Cannell, E. Arms, and N. Chaubey, (May) 59
Floating Turbine Captures Wind Energy in Deep-Water Environment — V. I. Moe, (May) 54
Gas Safety Program, Establishing a — D. J. Marquard, (Nov) 40
Gas Surges Improves GMAW Profitability, Reducing — R. Green, (Oct) 32
Getting the Most Out of Your Exothermic Cutting Equipment — C. Wilsoncroft, (Jan) 94
GMAW, Argon/Oxygen Shielding Gases Improve Carbon Steel — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
GMAW Gun Type Is Right for Your Application?, Air vs. Water Cooled: Which — A. Monk, (Jan) 91
Greener Future, Stud Welding Technologies for a — C. Hsu and D. Phillips, (Oct) 38
GTAW Arc Starts, Tips To Improve — J. Luck, (July) 42
GTAW 4130 Chrome-Moly Tubing, Best Practices of — T. Bevis and A. Weyenberg, (April) 42

Part 1 — WELDING JOURNAL
SUBJECT INDEX

A Most Challenging Project: Repair of the Sophia D — U. W. Aschemeier and K. S. Peters, (May) 38
A Summary of Revisions in the New D1.1: 2010, *Structural Welding Code — Steel* — J. L. Gayler and D. D. Rager, (July) 47
Accidents, Oxyfuel Equipment Advances Help Prevent — B. Boyer, (Nov) 42
Adaptive Control Techniques Advance Automatic Welding — P. Sagues, (Aug) 26
Air vs. Water Cooled: Which GMAW Gun Type Is Right for Your Application? — A. Monk, (Jan) 91
Alloy Steels, Selecting SAW Consumables for Low- — K. Packard, (Aug) 24
An Alternative Solution for Sputtering Targets for High-Volume Thin-Film Deposition — J. Villafuerte and D. Wright, (Sept) 28
Argon/Oxygen Shielding Gases Improve Carbon Steel GMAW — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
Artists 'Think' in Metal — K. Campbell, M. R. Johnsen, and H. Woodward, (July) 28
ASME Section IX?, What's New in — W. J. Sperko, (Aug) 44
Assurance in Field Heat Treatment, Quality — G. Lewis, (June) 46
Automatic Welding, Adaptive Control Techniques Advance — P. Sagues, (Aug) 26
Automating Field Welding for New Nuclear Construction — G. R. Cannell, E. Arms, and N. Chaubey, (May) 59
Automation, Maximizing Your Investment in Welding — R. Ryan and T. Jaeger, (Mar) 44
Automation: Opportunities for Increased Efficiency and Savings — D. Steadman, (Aug) 34
AWS Show, Special Report on the 2009 — K. Campbell, A. Cullison, C. Guzman, and M. R. Johnsen, (Feb) 37
Best Practices of GTAW 4130 Chrome-Moly Tubing — T. Bevis and A. Weyenberg, (April) 42
BP Modernizes U.S. Refinery — S. Disbrow and C. Kramer, (Feb) 32
Brazing Filler Metals — Good or Bad?, Liquidation of — D. Kay, (Sept) 36
Brazing Metal to Ceramic in an Oxygen-Containing Atmosphere — M. S. Reichle, T. Koppitz, and U. Reisgen, (Mar) 57
Brazing of Sapphire to Niobium, Direct — C. A. Walker, F. R. Trowbridge, and A. R. Wagner, (Mar) 50
Brazing Temperature, Calculating Joint Clearance at — D. G. Stroppa, T. Hermenegildo, J. Unfried S., N. Oliveira, and A. J. Ramirez, (Sept) 32
Calculating Joint Clearance at Brazing Temperature — D. G. Stroppa, T. Hermenegildo, J. Unfried S., N. Oliveira, and A. J. Ramirez, (Sept) 32
Carbon Steel GMAW, Argon/Oxygen Shielding Gases Improve — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
Career Ladder in Welding, Using Competency Models to Build a — D. W. Dickinson, (April) 53
Ceramic in an Oxygen-Containing Atmosphere, Brazing Metal to — M. S. Reichle, T. Koppitz, and U. Reisgen, (Mar) 57
Choosing a Shielding Gas for FCAW — T. Myers, (Mar) 30
Chrome-Moly Tubing, Best Practices of GTAW 4130 — T. Bevis and A. Weyenberg, (April) 42
Code Requirements for Calculating Heat Input, New — T. Melfi, (June) 1
Code — Steel, A Summary of Revisions in the New D1.1: 2010, *Structural Welding* — J. L. Gayler and D. D. Rager, (July) 47
Competency Models to Build a Career Ladder in Welding, Using — D. W. Dickinson, (April) 53
Competition Is a Family Affair — M. R. Johnsen, (June) 116
Complying with OSHA's Cr(VI) Regulations — S. Smith, (Nov) 28
Computational Weld Mechanics Help Industry?, How Can — S. S. Babu, G. Sonnenberg, C. Schwenk, J. Goldak, H. Porzner, S. P. Khurana, W. Zhang, and J. L. Gayler, (Jan) 40
Consumables for Low-Alloy Steels, Selecting SAW — K. Packard, (Aug) 24
Control Costs by Avoiding Overwelding — (Dec) 32
Control Techniques Advance Automatic Welding, Adaptive — P. Sagues, (Aug) 26
Copper Contamination Cracking in Austenitic Stainless Steel Welds — S. Rao and A. Y. Al-Kawaie, (Feb) 46
Correcting Thin-Plate Distortion in Shipbuilding — N. A. McPherson, (Jan) 30
Corrosion in a Refinery's Sour Water Unit?, What Caused — J. J. Perdomo, (Feb) 54
Costs by Avoiding Overwelding, Control — (Dec) 32
Cracking in Austenitic Stainless Steel Welds, Copper Contamination — S. Rao and A. Y. Al-Kawaie, (Feb) 46
Cranes, Weld Integrity Critical to Tower — G. Trommer, (April) 50
Creatures Decorate Canadian Water Park, Welded — S. Y. Tremblay, (June) 113
Direct Brazing of Sapphire to Niobium — C. A. Walker, F. R. Trowbridge, and A. R. Wagner, (Mar) 50
Distortion in Shipbuilding, Correcting Thin-Plate — N. A. McPherson, (Jan) 30
Driven Welding Machine, Selecting an Engine — E. Snyder, (April) 38
Efficiency and Savings, Automation: Opportunities for Increased — D. Steadman, (Aug) 34
Energy in Deep-Water Environment, Floating Turbine Captures Wind — V. I. Moe, (May) 54
Engine-Driven Welding Machine, Selecting an — E. Snyder, (April) 38
Establishing a Gas Safety Program — D. J. Marquard, (Nov) 40
Exothermic Cutting Equipment, Getting the Most Out of Your — C. Wilsoncroft, (Jan) 94
Fabricating Railcars with Resistance Welding — W. Jaxa-Rozen, (Dec) 26
FABTECH, (Oct) 44
Family Affair, Competition Is a — M. R. Johnsen, (June) 116
FCAW, Choosing a Shielding Gas for — T. Myers, (Mar) 30
Field Welding for New Nuclear Construction, Automating — G. R. Cannell, E. Arms, and N. Chaubey, (May) 59
Floating Turbine Captures Wind Energy in Deep-Water Environment — V. I. Moe, (May) 54
Gas Safety Program, Establishing a — D. J. Marquard, (Nov) 40
Gas Surges Improves GMAW Profitability, Reducing — R. Green, (Oct) 32
Getting the Most Out of Your Exothermic Cutting Equipment — C. Wilsoncroft, (Jan) 94
GMAW, Argon/Oxygen Shielding Gases Improve Carbon Steel — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
GMAW Gun Type Is Right for Your Application?, Air vs. Water Cooled: Which — A. Monk, (Jan) 91
Greener Future, Stud Welding Technologies for a — C. Hsu and D. Phillips, (Oct) 38
GTAW Arc Starts, Tips To Improve — J. Luck, (July) 42
GTAW 4130 Chrome-Moly Tubing, Best Practices of — T. Bevis and A. Weyenberg, (April) 42

GTAW, Veteran Triumphs over Adversity with — A. Weyenberg, (Oct) 34
Heat Input, New Code Requirements for Calculating — T. Melfi, (June) 61
Heat Treatment, Quality Assurance in Field — G. Lewis, (June) 46
Heat Treatment to Improve Weld Quality, Monitoring — P. Desai, (June) 109
Heating Delivers Production Benefits, Induction — A. Sherill, (June) 50
Homes for Haiti — K. Campbell and H. Woodward, (July) 50
How Can Computational Weld Mechanics Help Industry? — S. S. Babu, G. Sonnenberg, C. Schwenk, J. Goldak, H. Porzner, S. P. Khurana, W. Zhang, and J. L. Gayler, (Jan) 40
Implementing Robots into a Submerged Arc Welding Operation — C. E. Boyer, (Aug) 38
Improve GTAW Arc Starts, Tips To — J. Luck, (July) 42
Induction Heating Delivers Production Benefits — A. Sherill, (June) 50
Integrity Critical to Tower Cranes, Weld — G. Trommer, (April) 50
Investment in Welding Automation, Maximizing Your — R. Ryan and T. Jaeger, (Mar) 44
Job #1: Welding Safety — B. Gardner, (Nov) 36
Joint Clearance at Brazing Temperature, Calculating — D. G. Stroppa, T. Hermenegildo, J. Unfried S., N. Oliveira, and A. J. Ramirez, (Sept) 32
Kentucky Power Plant Turns to Orbital Pipe Welding for Expansion — L. Brioux, (June) 58
Laminated Steel, Resistance Spot Welding of Sound-Damping — D. Sigler and R. A. Waldo, (Dec) 42
Laser Beam Welding Process Automates Underwater Repairs — R. Bucurel and G. Hlifka, (Jan) 47
Laser Welding of Thin Structures, Precision — A. Deceuster, G. Stewardson, and L. Li, (July) 38
Liquidation of Brazing Filler Metals — Good or Bad? — D. Kay, (Sept) 36
Low-Alloy Steels, Selecting SAW Consumables for — K. Packard, (Aug) 24
Maximizing Your Investment in Welding Automation — R. Ryan and T. Jaeger, (Mar) 44
Measuring Contact Angles on Sessile Drop Test Samples — D. G. Stroppa, J. Unfried S., T. Hermenegildo, and A. J. Ramirez, (Mar) 47
Monitoring Heat Treatment to Improve Weld Quality — P. Desai, (June) 109
New Code Requirements for Calculating Heat Input — T. Melfi, (June) 61
New Welding Wire for Thin Steel Sheet — Y. Umehara, R. Suzuki, and T. Nakano, (Mar) 34
Nuclear Construction, Automating Field Welding for New — G. R. Cannell, E. Arms, and N. Chaubey, (May) 59
Nuclear Power— Round Two, Preparing for — M. Cox and G. R. Cannell, (June) 55
Offshore Platforms, Options for Making Underwater Repairs to — W. J. Couch, (Jan) 36
Oil Industry Challenges for the 21st Century — H. H. Campbell, (Feb) 50
1 1/4 CR-1/2Mo Steels,Techniques for Joining — J. Brennan and B. Pletcher, (April) 46
Optimizing the Next-Generation Resistance Welding Cell — N. Scotchmer, J. Duran, and K. R. Chan, (Dec) 34
Optimizing Welding and Cutting for Wind Tower Production — T. Finndin, (Aug) 30
Options for Making Underwater Repairs to Offshore Platforms — W. J. Couch, (Jan) 36
Orbital Pipe Welding for Expansion, Kentucky Power Plant Turns to — L. Brioux, (June) 58
OSHA's Cr (VI) Regulations, Complying with — S. Smith, (Nov) 28
Overwelding, Control Costs by Avoiding — (Dec) 32
Oxyfuel Equipment Advances Help Prevent Accidents — B. Boyer, (Nov) 42
Plasma Cutting Machine, Pointers for Choosing a — (Sept) 83
P91 Steels, Welding and Postweld Heat Treatment of — W. F. Newell Jr., (April) 33
Pointers for Choosing a Plasma Cutting Machine — (Sept) 83
Postweld Heat Treatment of P91 Steels,Welding and — W. F. Newell Jr., (April) 33
Power Plant Turns to Orbital Pipe Welding for Expansion, Kentucky — L. Brioux, (June) 58
Precision Laser Welding of Thin Structures — A. Deceuster, G. Stewardson, and L. Li, (July) 38
Pricing, Ten Tips for Better — R. Mohammed, (Dec) 40
Preparing for Nuclear Power — Round Two — M. Cox and G. R. Cannell, (June) 55
Quality Assurance in Field Heat Treatment — G. Lewis, (June) 46
Railcars with Resistance Welding, Fabricating — W. Jaxa-Rozen, (Dec) 26
Railroad Welding: Stringently Regulated for Safety — M. Untermeyer, (Sept) 24
Reducing Gas Surges Improves GMAW Profitability — R. Green, (Oct) 32
Refinery, BP Modernizes U.S. — S. Disbrow and C. Kramer, (Feb) 32
Refinery's Sour Water Unit?,What Caused Corrosion in a — J. J. Perdomo, (Feb) 54
Repair of the Sophia D, A Most Challenging Project: — U. W. Aschemeier and K. S. Peters, (May) 38
Repairing an Underwater Pipeline — U. W. Aschemeier and K. S. Peters, (Jan) 87
Resistance Spot Welding of Sound-Damping Laminated Steel — D. Sigler and R. A. Waldo, (Dec) 42
Resistance Welding Cell, Optimizing the Next-Generation — N. Scotchmer, J. Duran, and K. R. Chan, (Dec) 34
Resistance Welding, Fabricating Railcars with — W. Jaxa-Rozen, (Dec) 26
Revisions in the New D1.1: 2010, *Structural Welding Code — Steel*, A Summary of — J. L. Gayler and D. D. Rager, (July) 47
Robots into a Submerged Arc Welding Operation, Implementing — C. E. Boyer, (Aug) 38
Safety, Job #1: Welding — B. Gardner, (Nov) 36
Safety Program, Establishing a Gas — D. J. Marquard, (Nov) 40
Safety, Railroad Welding: Stringently Regulated for — M. Untermeyer, (Sept) 24
Salesperson Do for You?, What Can Your Welding — H. M. Woodward, K. Campbell, and M. R. Johnsen, (Nov) 30
Selecting an Engine-Driven Welding Machine — E. Snyder, (April) 38
Selecting SAW Consumables for Low-Alloy Steels — K. Packard, (Aug) 24
Sessile Drop Test Samples, Measuring Contact Angles on — D. G. Stroppa, J. Unfried S., T. Hermenegildo, and A. J. Ramirez, (Mar) 47
Sheet, New Welding Wire for Thin Steel — Y. Umehara, R. Suzuki, and T. Nakano, (Mar) 34
Shielding Gas for FCAW, Choosing a — T. Myers, (Mar) 30
Shielding Gases Improve Carbon Steel GMAW, Argon/Oxygen — S. Laymon, C. Chritz, and F. Schweighardt, (Mar) 40
Skills to Welders, Teaching Human Development — J. D. Compton, (Sept) 88
Slag as Submerged Arc Welding Flux, The Use of Crushed — D. Murlin, (Aug) 41
Soldered and Brazed Joints, Tips for Producing Strong — G. Mitchell, (Aug) 40
Sound-Damping Laminated Steel, Resistance Spot Welding of — D. Sigler and R. A. Waldo, (Dec) 42
Spatter, Ways to Limit — A. J. Manz, (Sept) 86
Special Report on the 2009 AWS Show — K. Campbell, A. Cullison,

C. Guzman, and M. R. Johnsen, (Feb) 36
Sputtering Targets for High-Volume Thin Film Deposition, An Alternative Solution for — J. Villafuerte and D. Wright, (Sept) 28
Stainless Steel Welds, Copper Contamination Cracking in Austenitic — S. Rao and A. Y. Al-Kawaie, (Feb) 46
Steel, Tips for Welding Stainless — B. Williams, (May) 46
Stud Welding Technologies for a Greener Future — C. Hsu and D. Phillips, (Oct) 38
Submerged Arc Welding Flux, The Use of Crushed Slag as — D. Murlin, (Aug) 41
Submerged Arc Welding Operation, Implementing Robots into a — C. E. Boyer, (Aug) 38
Teaching Human Development Skills to Welders — J. D. Compton, (Sept) 88
Techniques for Joining 1 1/4 CR-1/2 Mo Steels — J. Brennan and B. Pletcher, (April) 46
Ten Tips for Better Pricing — R. Mohammed, (Dec) 40
Test Samples, Measuring Contact Angles on Sessile Drop — D. G. Stroppa, J. Unfried S., T. Hermenegildo, and A. J. Ramirez, (Mar) 47
Thin Structures, Precision Laser Welding of — A. Deceuster, G. Stewardson, and L. Li, (July) 38
Tips for Producing Strong Soldered and Brazed Joints — G. Mitchell, (Aug) 40
Tips for Welding Stainless Steel — B. Williams, (May) 46
Tips to Improve GTAW Arc Starts — J. Luck, (July) 42
Tower Production, Optimizing Welding and Cutting for Wind — T. Finndin, (Aug) 30
Turbine Captures Wind Energy in Deep-Water Environment, Floating — V. I. Moe, (May) 54
Underwater Pipeline, Repairing an — U. W. Aschemeier and K. S. Peters, (Jan) 87
Underwater Repairs, Laser Beam Welding Process Automates — R. Bucurel and G. Hlifka, (Jan) 47
Underwater Repairs to Offshore Platforms, Options for Making — W. J. Couch, (Jan) 36
Use of Crushed Slag as Submerged Arc Welding Flux, The — D. Murlin, (Aug) 41
Using Competency Models to Build a Career Ladder in Welding — D. W. Dickinson, (April) 53
Veteran Triumphs over Adversity with GTAW — A. Weyenberg, (Oct) 34
Water Park, Welded Creatures Decorate Canadian — S. Y. Tremblay, (June) 113
Ways to Limit Spatter — A. J. Manz, (Sept) 86
Weld Integrity Critical to Tower Cranes — G. Trommer, (April) 50
Welded Creatures Decorate Canadian Water Park — S. Y. Tremblay, (June) 113
Welding and Postweld Heat Treatment of P91 Steels — W. F. Newell Jr., (April) 33
What Can Your Welding Salesperson Do for You? — H. M. Woodward, K. Campbell, and M. R. Johnsen, (Nov) 30.
What Caused Corrosion in a Refinery's Sour Water Unit? — J. J. Perdomo, (Feb) 54
What's New in ASME Section IX? — W. J. Sperko, (Aug) 44
Wind Tower Production, Optimizing Welding and Cutting for — T. Finndin, (Aug) 30
Winds of Opportunity — D. W. Reckman, (May) 50
Wire for Thin Steel Sheet, New Welding — Y. Umehara, R. Suzuki, and T. Nakano, (Mar) 34

Part 2 – RESEARCH SUPPLEMENT SUBJECT INDEX

A Control System for Keyhole Plasma Arc Welding of Stainless Steel Plates with Medium Thickness — C. S. Wu, C. B. Jia, and M. A. Chen, (Nov) 225-s
A New Method for the Design of Welding Consumables — D. S. Tordonato, J. C. Madeni, S. Babu, S. Liu, and P. Mendez, (Oct) 201-s
Alloying Enrichment of Weld Metal Deposited with Coated Cellulosic Electrodes, Effect of Welding Parameters and Electrode Condition on — J. E. Ramirez and M. Johnson, (Nov) 232-s
Aluminum Alloys during Friction Stir Welding, Characteristic Temperature Curves for — C. Hamilton, S. Dymek, and A. Sommers, (Sept) 189-s
Aluminum, Comparison of Control Algorithms for Ultrasonic Welding of — M. Baboi and D. Grewell, (Nov) 243-s
Aluminum Sheet for Tailor Welded Blank Applications, Double-Sided Arc Welding of AA5182-O — J. A. Moulton and D. C. Weckman, (Jan) 11-s
Aluminum Surface by Variable-Polarity Arc, Cathodic Cleaning of Oxides from — R. Sarrafi and R. Kovacevic, (Jan) 1-s
Aluminum 3003 Blocks Fabricated by Ultrasonic Additive Manufacturing, Microstructural Characterization of Bonding Interfaces in — D. E. Schick, R. M. Hahnlen, R. Dehoff, P. Collins, S. S. Babu, M. J. Dapino, and J. C. Lippold, (May) 105-s
Amplitude Stepping in Ultrasonic Welding, Evaluation of — M. Baboi and D. Grewell, (Aug) 161-s
Baking on the Structure and Properties of Resistance Spot Welds in 780 MPa Dual-Phase and Trip Steels, Effects of — M. Tumuluru, (May) 91-s
Cathodic Cleaning of Oxides from Aluminum Surface by Variable-Polarity Arc — R. Sarrafi and R. Kovacevic, (Jan) 1-s
Characteristic Temperature Curves for Aluminum Alloys during Friction Stir Welding — C. Hamilton, S. Dymek, and A. Sommers, (Sept) 189-s
Characterization of Welding Fume from SMAW Electrodes — Part II — J. W. Sowards, A. J. Ramirez, D. W. Dickinson, and J. C. Lippold, (Apr) 82-s
Characterization of Welding Fume Generated by High-Mn Consumables — M. J. Gonser, J. C. Lippold, D. W. Dickinson, J. W. Sowards, and A. J. Ramirez, (Feb) 25-s
Coated Cellulosic Electrodes, Effect of Welding Parameters and Electrode Condition on Alloying Enrichment of Weld Metal Deposited with — J. E. Ramirez and M. Johnson, (Nov) 232-s
Comparison of Control Algorithms for Ultrasonic Welding of Aluminum — M. Baboi and D. Grewell, (Nov) 243-s
Composite Coating on Cu Substrate, Materials Transfer in Electro-Spark Deposition of TiC_p/Ni Metal-Matrix — S. K. Tang, T. C. Nguyen, and Y. Zhou, (Aug) 172-s
Consumables, A New Method for the Design of Welding— D. S. Tordonato, J. C. Madeni, S. Babu, S. Liu, and P. Mendez, (Oct) 201-s
Degradation Characterization in the Friction Stir Welding of Hard Metals, Tool — B. Thompson and S. S. Babu, (Dec) 256-s
Development of a Time-Resolved Energy Absorbtion Measurement Technique for Laser Beam Spot Welds — J. T. Norris, C. V. Robino, M. J. Perricone, and D. A. Hirschfeld, (Apr) 75-s
Distortion in Multipass GMAW Welds of Different Groove Sizes, Effect Pulse Current on Shrinkage Stress and — P. K. Gosh, K. Devakumaran, and A. K. Pramanick, (Mar) 43-s
Double-Sided Arc Welding of AA5182-O Aluminum Sheet for Tailor Welded Blank Applications — J. A. Moulton and D. C. Weckman, (Jan) 11-s
Dual-Phase and Trip Steels, Effects of Baking on the Structure and Properties of Resistance Spot Welds in 780 MPa — M. Tumuluru, (May) 91-s
Effect of Pulse Current on Shrinkage Stress and Distortion in Multipass GMA Welds of Different Groove Sizes — P. K. Ghosh, K. Devakumaran, and A. K. Pramanick, (Mar) 43-s
Effects of Baking in the Structure and Properties of Resistance Spot Welds in 780 MPa Dual-Phase and Trip Steels — M. Tumuluru, (May) 91-s
Effects of Continuous Cooling Transformation Variations on Numerical Calculation of Welding-Induced Residual Stresses — J. Caron, C. Heinze, C. Schwenk, M. Rethmeier, S. S. Babu, and J. Lippold, (July) 151-s
Effects of Nb, V, and W on Microstructure and Abrasion Resistance of Fe-Cr-C Hardfacing Alloys — Q. Wang and X. Li, (July) 133-s
Electro-Spark Deposition of TiC_p/Ni Metal-Matrix Composite Coating on Cu Substrate, Materials Transfer in — S. K. Tang, T. C. Nguyen, and Y. Zhou, (Aug) 172-s
Evaluation of Amplitude Stepping in Ultrasonic Welding — M. Baboi and D. Grewell, (Aug) 161-s
Fatigue Studies of Welded Joints, Using Infrared Thermography in Low-Cycle — V. Crupi, G. Chiofalo, and E. Guglielmino, (Sept) 195-s
Ferritic Deposits: The Challenge Is Tensile Properties, SMAW, FCAW, and SAW High-Strength — E. S. Surian, N. M. Ramini De Rissone, H. G. Svoboda, R. Rep, and L. A. De Veida, (Mar) 54-s
Ferritic Steel Clad Successively with Ni-Based and 9Cr Filler Metals, Microstructural Changes in Grade 22 — R. Anand, C. Sudha, V. Thomas Paul, S. Saroja, and M. Vijayalakshmi, (April) 65-s

Friction Stir Welding, Characteristic Temperature Curves for Aluminum Alloys during — C. Hamilton, S. Dymek, and A. Sommers, (Sept) 189-s
Friction Stir Welding of Hard Metals, Tool Degradation Characterization in the — B. Thompson and S. S. Babu, (Dec) 256-s
Fume from SMAW Electrodes,Characterization of Welding — Part II — J. W. Sowards, A. J. Ramirez, D. W. Dickinson, and J. C. Lippold, (Apr) 82-s
Fume Generated by High-Mn Consumables, Characterization of Welding — M. J. Gonser, J. C. Lippold, D. W. Dickinson, J. W. Sowards, and A. J. Ramirez, (Feb) 25-s
GMAW, Laser-Enhanced — Y. Huang and Y. M. Zhang, (Sept) 181-s
Hardfacing Alloys, Effects of Nb, V, and W on Microstructure and Abrasion Resistance of Fe-Cr-C — Q. Wang and X. Li, (July) 133-s
High-Mn Consumables, Characterization of Welding Fume Generated by — M. J. Gonser, J. C. Lippold, D. W. Dickinson, J. W. Sowards, and A. J. Ramirez, (Feb) 25-s
Hot Ductility Behavior and Repair Weldability of Service-Aged, Heat-Resistant Stainless Steel Castings — S. Shi, J. C. Lippold, and J. Ramirez, (Oct) 210-s
Hybrid Laser Arc Welding Process Evaluation on DH36 and EH36 Steel — C. Roepke, S. Liu, S. Kelly, and R. Martukanitz, (July) 140-s
Hydrocarbon Contamination and Diffusible Hydrogen Levels in Shielded Metal Arc Weld Deposits — B. M. Patchett and M. A. R. Yarmuch, (Dec) 262-s
Hydrogen-Charged Steel for Modification or Repair, Welding of — R. J. Pargeter and M. D. Wright, (Feb) 34-s
Hydrogen Levels in Shielded Metal Arc Weld Deposits, Hydrocarbon Contamination and Diffusible — B. M. Patchett and M. A. R. Yarmuch, (Dec) 262-s
Interfaces in Aluminum 3003 Blocks Fabricated by Ultrasonic Additive Manufacturing, Microstructural Characterization of Bonding — D. E. Schick, R. M. Hahnlen, R. Dehoff, P. Collins, S. S. Babu, M. J. Dapino, and J. C. Lippold, (May) 105-s
Laser Arc Welding Process Evaluation on DH36 and EH36 Steel, Hybrid — C. Roepke, S. Liu, S. Kelly, and R. Martukanitz, (July) 140-s
Laser Beam Spot Welds, Development of a Time-Resolved Energy Absorption Measurement Technique for — J. T. Norris, C. V. Robino, M. J. Perricone, and D. A. Hirschfeld, (Apr) 75-s
Laser-Enhanced GMAW — Y. Huang and Y. M. Zhang, (Sept) 181-s
Materials Transfer in Electro-Spark Deposition of TiC_p/Ni Metal-Matrix Composite Coating on Cu Substrate — S. K. Tang, T. C. Nguyen, and Y. Zhou, (Aug) 172-s
Measurement and Estimation of Weld Pool Surface Depth and Weld Penetration in Pulsed Gas Metal Arc Welding — Z. Wang, Y. M. Zhang, and L. Wu, (June) 117-s
Microstructural Changes in Grade 22 Ferritic Steel Clad Successively with Ni-Based and 9Cr Filler Metals — R. Anand, C. Sudha, V. Thomas Paul, S. Saroja, and M. Vijayalakshmi, (April) 65-s
Microstructural Characterization of Bonding Interfaces in Aluminum 3003 Blocks Fabricated by Ultrasonic Additive Manufacturing — D. E. Schick, R. M. Hahnlen, R. Dehoff, P. Collins, S. S. Babu, M. J. Dapino, and J. C. Lippold, (May) 105-s
Microstructure and Abrasion Resistance of Fe-Cr-C Hardfacing Alloys, Effects of Nb, V, and W on — Q. Wang and X. Li, (July) 133-s
Monitoring System Based on Real-Time Electrical Signal Analysis, Seam Welding — M. Lanzoni, M. Salomoni, and B. Riccò, (Oct) 218-s
Ni-Based and 9Cr Filler Metals, Microstructural Changes in Grade 22 Ferritic Steel Clad Successively with — R. Anand, C. Sudha, V. Thomas Paul, S. Saroja, and M. Vijayalakshmi, (April) 65-s
Nickel Joint with Filler Metal, Spot Resistance Welding of a Titanium/ — H. Zuhailawati, A. M. Saeed, A. B. Ismail, Z. Samad, and T. Ariga, (May) 101-s
Oxides from Aluminum Surface by Variable-Polarity Arc, Cathodic Cleaning of — R. Sarrafi and R. Kovacevic, (Jan) 1-s
Penetration In Pulsed Gas Metal Arc Welding, Measurement and Estimation of Weld Pool Surface Depth and Weld — Z. Wang, Y. M. Zhang, and L. Wu, (June) 117-s
Pipeline Steel, Residual Stresses in Weld Thermal Cycle Simulated Specimens of X70 — M. I. Onsøien, M. M'Hamdi, and O. M. Akselsen, (June) 127-s
Plasma Arc Welding of Stainless Steel Plates with Medium Thickness, A Control System for Keyhole — C. S. Wu, C. B. Jia, and M. A. Chen, (Nov) 225-s
Process Evaluation on DH36 and EH36 Steel, Hybrid Laser Arc Welding — C. Roepke, S. Liu, S. Kelly, and R. Martukanitz, (July) 140-s
Pulse Current on Shrinkage Stress and Distortion in Multipass GMA Welds of Different Groove Sizes, Effect of — P. K. Ghosh, K. Devakumaran, and A. K. Pramanick, (Mar) 43-s
Pulsed Gas Metal Arc Welding, Measurement and Estimation of Weld Pool Surface Depth and Weld Penetration in — Z. Wang, Y. M. Zhang, and L. Wu, (June) 117-s
Repair Weldability of Service-Aged, Heat-Resistant Stainless Steel Castings, Hot Ductility Behavior and — S. Shi, J. C. Lippold, and J. Ramirez, (Oct) 210-s
Repair, Welding of Hydrogen-Charged Steel for Modification or — R. J. Pargeter and M. D. Wright, (Feb) 34-s
Resistance Welding of a Titanium/Nickel Joint with Filler Metal, Spot — H. Zuhailawati, A. M. Saeed, A. B. Ismail, Z. Samad, and T. Ariga, (May) 101-s
Residual Stresses, Effects of Continuous Cooling Transformation Variations on Numerical Calculation of Welding-Induced — J. Caron, C. Heinze, C. Schwenk, M. Rethmeier, S. S. Babu, and J. Lippold, (July) 151-s
Residual Stresses in Weld Thermal Cycle Simulated Specimens of X70 Pipeline Steel — M. I. Onsøien, M. M'Hamdi, and O. M. Askelsen, (June) 127-s
Robotic Shielded Metal Arc Welding — E. J. Lima II and A. Q Bracarense, (Aug) 166-s
Seam Welding Monitoring System Based on Real-Time Electrical Signal Analysis — M. Lanzoni, M. Salomoni, and Bruno Riccò, (Oct) 218-s
Shielded Metal Arc Weld Deposits, Hydrocarbon Contamination and Diffusible Hydrogen Levels in — B. M. Patchett and M. A. R. Yarmuch, (Dec) 262-s
Shielded Metal Arc Welding, Robotic — E. J. Lima II and A. Q Bracarense, (Aug) 166-s
Signal Analysis, Seam Welding Monitoring System Based on Real-Time Electrical — M. Lanzoni, M. Salomoni, and B. Riccò, (Oct) 218-s
Shrinkage Stress and Distortion in Multipass GMA Welds of Different Groove Sizes, Effect of Pulse Current on — P. K. Ghosh, K. Devakumaran, and A. K. Pramanick, (Mar) 43-s
SMAW, FCAW, and SAW High-Strength Ferritic Deposits: The Challenge Is Tensile Properties — E. S. Surian, N. M. Ramini De Rissone, H. G. Svoboda, R. Rep, and L. A. De Vedia, (Mar) 54-s
Spot Resistance Welding of a Titanium/Nickel Joint with Filler Metal — H. Zuhailawati, A. M. Saeed, A. B. Ismail, Z. Samad, and T. Ariga, (May) 101-s
Spot Welds, Development of a Time-Resolved Energy Absorption Measurement Technique for Laser Beam — J. T. Norris, C. V. Robino, M. J. Perricone, and D. A. Hirschfeld, (Apr) 75-s
Spot Welds in 780 MPa Dual-Phase and Trip Steels, Effects of Baking on the Structure and Properties of Resistance — M. Tumuluru, (May) 91-s
Stainless Steel Castings, Hot Ductility Behavior and Repair Weldability of Service-Aged, Heat-Resistant— S. Shi, J. C. Lippold, and J. Ramirez, (Oct) 210-s
Stainless Steel Plates with Medium Thickness, A Control System for Keyhole Plasma Arc Welding of — C. S. Wu, C. B. Jia, and M. A.

Chen, (Nov) 225-s
Stresses in Weld Thermal Cycle Simulated Specimens of X70 Pipeline Steel, Residual — M. I. Onsøien, M. M'Hamdi, and O. M. Akselsen, (June) 127-s
Surface Depth and Weld Penetration in Pulsed Gas Metal Arc Welding, Measurement and Estimation of Weld Pool — Z. Wang, Y. M. Zhang, and L. Wu, (June) 117-s
Tailor Welded Blank Applications, Double-Sided Arc Welding of AA5182-O Aluminum Sheet for — J. A. Moulton and D. C. Weckman, (Jan) 11-s
Tensile Properties, SMAW, FCAW, and SAW High-Strength Ferritic Deposits: The Challenge Is — E. S. Surian, N. M. Ramini De Rissone, H. G. Svoboda, R. Rep, and L. A. De Vedia, (Mar) 54-s
Thermal Cycle Simulated Specimens of X70 Pipeline Steel, Residual Stresses in Weld — M. I. Onsøien, M. M'Hamdi, and O. M. Akselsen, (June) 127-s
Thermography in Low-Cycle Fatigue Studies of Welded Joints Using Infrared — V. Crupi, G. Chiofalo, and E. Guglielmino, (Sept) 195-s
Titanium/Nickel Joint with Filler Metal, Spot Resistance Welding of a — H. Zuhailawati, A. M. Saeed, A. B. Ismail, Z. Samad, and T. Ariga, (May) 101-s
Tool Degradation Characterization in the Friction Stir Welding of Hard Metals — B. Thompson and S. S. Babu, (Dec) 256-s
Transformation Variations on Numerical Calculation of Welding-Induced Residual Stresses, Effects of Continuous Cooling — J. Caron, C. Heinze, C. Schwenk, M. Rethmeier, S. s. Babu, and J. Lippold, (July) 151-s
Ultrasonic Additive Manufacturing, Microstructural Characterization of Bonding Interfaces in Aluminum 3003 Blocks Fabricated by — D. E. Schick, R. M. Hahnlen, R. Dehoff, P. Collins, S. S. Babu, M. J. Dapino, and J. C. Lippold, (May) 105-s
Ultrasonic Welding, Evaluation ofAmplitude Stepping in — M.Baboi and D. Grewell, (Aug) 161-s
Ultrasonic Welding of Aluminum, Comparison of Control Algorithms for — M. Baboi and D. Grewell, (Nov) 243-s
Using Infrared Thermography in Low-Cycle Fatigue Studies of Welded Joints — V. Crupi, G. Chiofalo, and E. Guglielmino, (Sept) 195-s
Welding of Hydrogen-Charged Steel for Modification of Repair — R. J. Pargeter and M. D. Wright, (Feb) 34-s

Devakumaran, K., Pramanick, A. K., and Ghosh, P. K. — Effect of Pulse Current on Shrinkage Stress and Distortion in Multipass GMA Welds of Different Groove Sizes, (Mar) 43-s
Dickinson, D. W., Sowards, J. W., Ramirez, A. J., Gonser, M. J., and Lippold, J. C. — Characterization of Welding Fume Generated by High-Mn Consumables, (Feb) 25-s
Dymek, S., Sommers, A., and Hamilton, C. — Characteristic Temperature Curves for Aluminum Alloys during Friction Stir Welding, (Sept) 189-s
Ghosh, P. K., Devakumaran, K., and Pramanick, A. K. — Effect of Pulse Current on Shrinkage Stress and Distortion in Multipass GMA Welds of Different Groove Sizes, (Mar) 43-s
Gonser, M. J., Lippold, J. C., Dickinson, D. W., Sowards, J. W., and Ramirez, A. J. — Characterization of Welding Fume Generated by High-Mn Consumables, (Feb) 25-s
Grewell, D., and Baboi, M.— Comparison of Control Algorithms for Ultrasonic Welding of Aluminum, (Nov) 243-s
Grewell, D., and Baboi, M. — Evaluation of Amplitude Stepping in Ultrasonic Welding, (Aug) 161-s
Guglielmino, E., Crupi, V., and Chiofalo, G. — Using Infrared Thermography in Low-Cycle Fatigue Studies of Welded Joints, (Sept) 195-s
Hahnlen, R. M., Dehoff, R., Collins, P., Babu, S. S., Dapino, M. J., Lippold, J. C., and Schick, D. E. — Microstructural Characterization of Bonding Interfaces in Aluminum 3003 Blocks Fabricated by Ultrasonic Additive Manufacturing, (May) 105-s
Hamilton, C., Dymek, S., and Sommers, A. — Characteristic Temperature Curves for Aluminum Alloys during Friction Stir Welding, (Sept) 189-s
Heinze, C., Schwenk, C., Rethmeier, M., Babu, S. S., Lippold, J., and

Caron, J. — Effects of Continuous Cooling Transformation Variations on Numerical Calculation of Welding-Induced Residual Stresses, (July) 151-s
Hirschfeld, D. A., Norris, J. T., Robino, C. V., and Perricone, M. J. — Developmentof a Time-Resolved Energy Absorption Measurement Technique for Laser Beam Spot Welds, (Apr) 75-s
Huang, Y., and Zhang, Y. M. — Laser-Enhanced GMAW, (Sept) 181-s
Ismail, A. B., Samad, Z., Ariga, T., Zuhailawati, H., and Saeed, A. M. — Spot Resistance Welding of a Titanium/Nickel Joint with Filler Metal — (May) 101-s
Jia, C. B., Chen, M. A., and Wu, C. S. — A Control System for Keyhole Plasma Arc Welding of Stainless Steel Plates with Medium Thickness, (Nov) 225-s
Johnson, M., and Ramirez, J. E. — Effect of Welding Parameters and Electrode Condition on Alloying Enrichment of Weld Metal Deposited with Coated Cellulosic Electrodes, (Nov) 232-s
Kelly, S., Martukanitz, R., Roepke, C., and Liu, S. — Hybrid Laser Arc Welding Process Evaluation on DH36 and EH36 Steel, (July) 140-s
Kovacevic, R., and Sarrafi, R. — Cathodic Cleaning of Oxides From Aluminum Surface by Variable-Polarity Arc (Jan) 1-s
Lanzoni, M., Salomoni, M., and Riccò, B. — Seam Welding Monitoring System Based on Real-Time Electrical Signal Analysis, (Oct) 218-s
Li, X., and Wang, Q.— Effects of Nb, V, and W on Microstructure and Abrasion Resistance of Fe-Cr-C Hardfacing Alloys, (July) 133-s
Lima II, E. J., and Bracarense, A. Q. — Robotic Shielded Metal Arc Welding, (Aug) 166-s
Lippold, J., Caron, J., Heinze, C., Schwenk, C., Rethmeier, M., and Babu, S. S. — Effects of Continuous Cooling Transformation Variations on Numerical Calculation of Welding-Induced Residual Stresses, (July) 151-s
Lippold, J. C., Dickinson, D. W., Sowards, J. W., Ramirez, A. J., and Gonser, M. J. — Characterization of Welding Fume Generated by High-Mn Consumables, (Feb) 25-s
Lippold, J. C., Schick, D. E., Hahnlen, R. M., Dehoff, R., Collins, P.; Babu, S. S., and Dapino, M. J. — Microstructural Characterization of Bonding Interfaces in Aluminum 3003 Blocks Fabricated by Ultrasonic Additive Manufacturing, (May) 105-s
Lippold, J. C., Ramirez, J., and Shi, S. — Hot Ductility Behavior and Repair Weldability of Service-Aged, Heat-Resistant Stainless Steel Castings, (Oct) 210-s
Liu, S., Kelly, S., Martukanitz, R., and Roepke, C. — Hybrid Laser Arc Welding Process Evaluation on DH36 and EH36 Steel, (July) 140-s
Liu, S., Mendez, P., Tordonato, D. S., Madeni, J. C., and Babu, S. — A New Method for the Design of Welding Consumables, (Oct) 201-s
Madeni, J. C., Babu, S., Liu, S., Mendez, P., and Tordonato, D. S. — A New Method for the Design of Welding Consumables, (Oct) 201-s
Martukanitz, R., Roepke, C., Liu, S., and Kelly, S. — Hybrid Laser Arc Welding Process Evaluation on DH36 and EH36 Steel, (July) 140-s
Mendez, P., Tordonato, D. S., Madeni, J. C., Babu, S., and Liu, S. — A New Method for the Design of Welding Consumables, (Oct) 201-s
M'Hamdi, M., Askelsen, O. M., and Onsøien, M. I. — Residual Stresses in Weld Thermal Cycle Simulated Specimens of X70 Pipeline Steel, (June) 127-s
Moulton, J. A., and Weckman, D. C. — Double-Sided Arc Welding of AA5182-O Aluminum Sheet for Tailor Welded Blank Applications, (Jan) 11-s
Nguyen, T. C., Zhou, Y., and Tang, S. K. — Materials Transfer in Electro-Spark Deposition of TiC_p/Ni Metal-Matrix Composite Coating on Cu Substrate, (Aug) 172-s
Norris, J. T., Robino, C. V., Perricone, M. J., and Hirschfeld, D. A. — Development of a Time-Resolved Energy Absorption Measurement Technique for Laser Beam Spot Welds, (Apr) 75-s
Onsøien, M. I., M'Hamdi, M., and Askelsen, O. M. — Residual Stresses in Weld Thermal Cycle Simulated Specimens of X70 Pipeline Steel, (June) 127-s
Pargeter, R. J., and Wright, M. D. — Welding of Hydrogen-Charged Steel for Modification or Repair, (Feb) 34-s
Patchett, B. M., and Yarmuch, M. A. R. — Hydrocarbon Contamination and Diffusible Hydrogen Levels in Shielded Metal Arc Weld Deposits, (Dec) 262-s
Perricone, M. J., Hirschfeld, D. A., Norris, J. T., and Robino, C. V. — Development of a Time-Resolved Energy Absorption Measurement Technique for Laser Beam Spot Welds, (Apr) 75-s
Pramanick, A. K., Ghosh, P. K., and Devakumaran, K. — Effect of Pulse Current on Shrinkage Stress and Distortion in Multipass GMA Welds of Different Groove Sizes, (Mar) 43-s
Ramini De Rissone, N. M., Svoboda, H. G., Rep, R., De Vedia, L. A., and Surian, E. S. — SMAW, FCAW, and SAW High-Strength Ferritic Deposits: The Challenge Is Tensile Properties, (Mar) 54-s
Ramirez, A. J., Gonser, M. J., Lippold, J. C., Dickinson, D. W., and Sowards, J. W. — Characterization of Welding Fume Generated by High-Mn Consumables, (Feb) 25-s
Ramirez, J., Shi, S., and Lippold, J. C. — Hot Ductility Behavior and Repair Weldability of Service-Aged, Heat-Resistant Stainless Steel Castings, (Oct) 210-s
Ramirez, J. E., and Johnson, M. — Effect of Welding Parameters and Electrode Condition on Alloying Enrichment of Weld Metal Deposited with Coated Cellulosic Electrodes, (Nov) 232-s
Rep, R., De Vedia, L. A., Surian, E. S., Ramini De Rissone, N. M., and Svoboda, H G., — SMAW, FCAW, and SAW High-Strength Ferritic Deposits: The Challenge Is Tensile Properties, (Mar) 54-s
Rethmeier, M., Babu, S. S., Lippold, J., Caron, J., Heinze, C., and Schwenk, C. — Effects of Continuous Cooling Transformation Variations on Numerical Calculation of Welding-Induced Residual Stresses, (July) 151-s
Riccò, B., Lanzoni, M., and Salomoni, M. — Seam Welding Monitoring System Based on Real-Time Electrical Signal Analysis, (Oct) 218-s

Get your $10,000+ AWS Standards Library FREE with an AWS Sustaining Company Membership

More than 500 Industry Leaders Can't Be Wrong.

Join an elite group of 500+ leading companies in the materials joining industry. Sustaining Company Membership is AWS' most prestigious level of membership, and is perfect for companies looking for the Best Value of all AWS Memberships. Upon becoming a Sustaining Company member, you'll receive your choice of one of three exclusive money-saving benefits:

1.) AWS Standards Library ($10,000+ Value),
2.) Discount Promotional Package - save 5% on *Welding Journal* advertising,
3.) 10 additional AWS Memberships

AWS Sustaining Company Memberships are loaded with a number of other priceless benefits, such as 10 AWS Individual Memberships and much more.
FOR MORE INFORMATION OR TO JOIN, VISIT US ON-LINE AT WWW.AWS.ORG, OR CALL US AT: (800) 443-9353, EXT. 480, OR (305) 443-9353, EXT. 480.
